8. Global assessment of the course (excellent = 5)		

Number of students in the course: 26	Number of surveys:	26
--------------------------------------	--------------------	----

PREVIOUS AVERAGE GRADES

Academic year 2015 - 2016	Global assessment of the course (excellent = 5)	
Academic year 2014 - 2015	Global assessment of the course (excellent = 5)	

2016-2017 Second Term average grade:

SECOND TERM 2016-2017
MACROECONOMICS I (cont.) (I)

9. Best features of the course

- Both professors are very good: knowledgeable, prepared, and always willing to help. I would like to remark Borja's permanent willingness to help at any time and for as much time as needed.
-
-
- Good TA
-
-
-
-
-
-
-

10. Worst features of the course

- Problem set sessions tend to become really tedious, especially given that the professor incentivized us to share our solutions and solve our doubts with him beforehand.
 -
 -
 -
 -
 -
 -
 -
 -
- problem set classes useless, if we always skip many steps and just write very basic steps (again, better less problems and these properly than too many and rushing)
- -

**SECOND TERM 2016-2017
MACROECONOMICS I (cont.) (II)**

-

11. Comments and suggestions

- I'd like to thank Borja for his patience and time in answering many of my silly questions.

-

-

-

-

-

Borja is nice but says "too easy" and "trivial" always and that does not help with explaining. Then noone in class asks anymore because every problem is too easy.

-

-

- professor's son is so lovely! The TA session is really helpful
